Creating your first project

Did you get yourself a KYP ID and are you logged in? Then we'll start creating your first project!
In KYP Project you can find several types of projects:

- Active:** All projects that have been activated and communicated to all participants
- Woningborg:** Quality control system (for Dutch companies only)
- Inactive:** All project schedules you create are automatically listed in this tab, where you can start as many projects as you want.
- Completed:** When a project is finished you can set it to 'completed'. This is your 'history' button in which projects are saved
- Create project:** This is where you start a new project. So let's get started!

New Project

Clicking '+ Create Project' will take you to the screen where you can enter the project information. The more details you add the better. You can change these details later if you wish.

Project name: Enter the project name, including your company name if relevant. This way, the project partner can quickly check for whom he is carrying out the project (handy when there are multiple projects available in KYP Project).

Start date: Here you stick sticky notes indicating the start date and the dates that follow (make sure you take into account things like the work preparation process)

Working days: Enter the contract days. If your project is overdue you can see by how many days you have exceeded the contract days.

Save: Click 'Save', which will move your schedule to the 'inactive' button. When you click on the project 'tile' of the project you have just created you'll be taken to the KYP Project scheduling function. Time to get that schedule started!

The screenshot shows a web form for creating a new project. The form is titled 'New Project' and has a light gray background. At the top right, there are two tabs: 'MY COMPANY' and 'SUPPLIERS'. The form contains several input fields: 'PROJECTNAME*' (with a blue arrow pointing to it), 'ADDRESS', 'TYPE*' (with a dropdown menu showing 'Select an option'), 'NUMBER', 'WEBSITE', 'POSTAL CODE', 'START DATE*' (with a date picker showing '06/05/2021'), 'CITY', 'WORKING DAYS', and 'COUNTRY' (with a dropdown menu showing 'Netherlands'). There is a green 'SAVE' button and a blue 'Cancel' link. At the bottom, there is a navigation bar with four tabs: 'Active (3)', 'Woningborg (1)', 'Inactive (11)', and 'Completed (11)'. A blue arrow points to the 'SAVE' button, and another blue arrow points to the 'Cancel' link.

Active (3) Woningborg (1) Inactive (11) Completed (11)

Schedule menu

When you open the KYP Project scheduling function you'll see seven buttons on the left. As project manager, you use these buttons to manage the entire project. The seven buttons are:

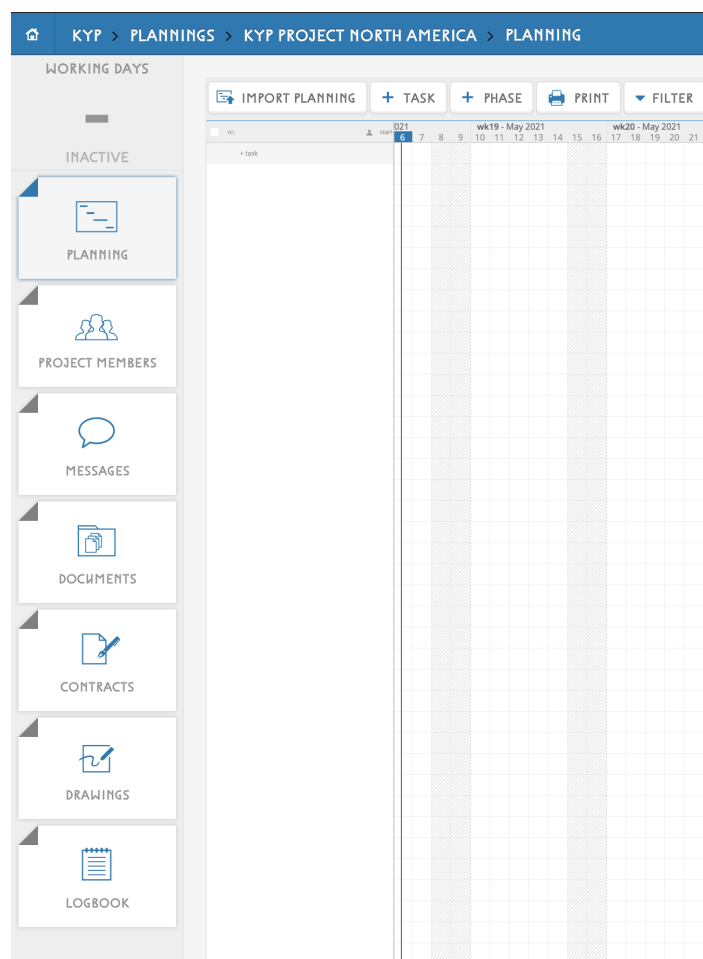

Planning: This button always takes you back to the schedule

Project members: Here you add project partners to the schedule and you'll also find the contact details of all project partners.

Messages: The KYP Project chat is an easy way to chat about jobs with the project partners.

Documents + Contracts + Drawing: Use these buttons to link specific documents to the jobs of the participants.

Logbook: Use this button if there are particular issues you want to record (delays, damage, etc.)

Menu bar

At the top of the schedule you'll see a blue menu bar. The various functions of this bar are explained below:

Home: This button takes you back to all your other schedules.

Search (magnifying glass): Use this button to search within the project (jobs, documents, participants).

KYP Project Support: If you have any question about KYP Project, you can use this button to contact the KYP team.

Gear: This button takes you to the KYP Project settings menu

Country / Language: Use this button to easily switch to another languages.

Profile / Log out: Here you can change your personal details or log out of KYP Project.

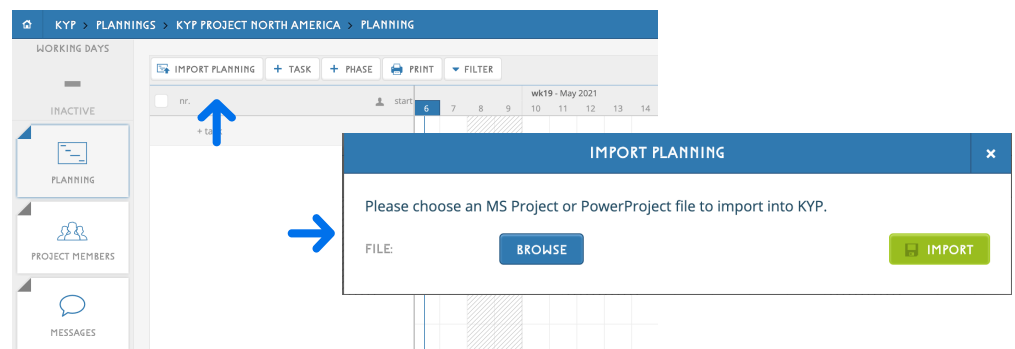

Start scheduling

Right, now that all the buttons have been explained, it's time to start scheduling!

Do you already have a planning in Asta Powerproject, Microsoft Project or Excel? You can easily import this planning to KYP Project.

Asta Powerproject and Microsoft Project

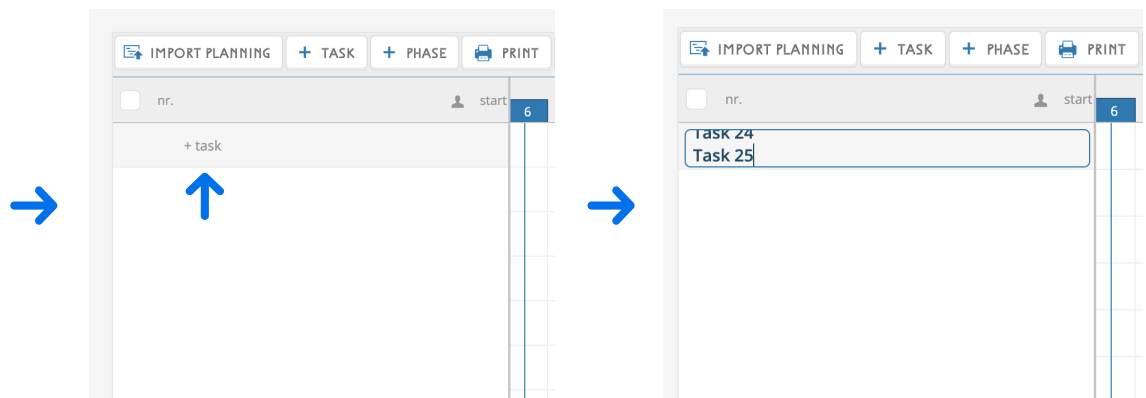

- Click the 'Import planning' button – Only available when the KYP Project schedule is completely empty.
- Select the schedule from your files. It should be saved as a .xml file.
- Import the schedule and voila, all the jobs and sticky notes will be right there in your KYP Project schedule!

Excel

- Go to your schedule in Excel and select only the jobs you want to transfer to the KYP Project.
- Copy the tasks – shortcut: CTRL+C / CMD+C (⌘)
- Return to KYP Project and click + job
- Paste the jobs into the + job bar using the shortcut: CTRL+V / CMD+V (⌘)
- Press enter and you'll get a list of all the jobs in the KYP Project schedule!

Creating tasks

Creating tasks

Not created a schedule yet, or perhaps importing isn't possible? It's easy to create your own schedule in KYP Project!

- ✧ Quickly create the tasks in the schedule in two ways:
 - ✧ Via the task button, which opens the task menu. (Explained below)
 - ✧ Via the +task bar. Fill in the task name and press enter. This is the quickest way to fill in all the task names and enter the following information later on.

The task menu

When you click on the name of a task or click on +task in the upper menu, you will see the task menu like below. The task menu has a number of options for entering more details:

Name: Here you'll find the name you gave the task

Responsible: Select who will carry out the task. You can choose from the people you've added to Participants. You'll find more information about this on page 12

Type: Assign a label to your project partner:
supplier or contractor

Start/End: This is the calendar function, here you can select from when to when the job should be carried out

Run through: Here you select whether you want the task to continue on a 'Holiday' or an 'Non-working day'

Notifications: You can use this function to send your project partners a notification (you can compose this yourself) a few days before the task starts. Once they've accepted it, you can be sure they'll deliver on time!

The screenshot shows the 'Task menu EN' interface. It includes a 'Task name' field with the text 'Aanbrengen'. Below it is a 'Responsible' dropdown menu with 'Select' as the current choice. The 'Lead time' section shows a clock icon, a minus/plus button, '0' days, and a date range from '22/09/2022' to 'dd/mm/yy'. The 'Run through' section has two checkboxes: 'Holiday' and 'Unworkable'. At the bottom right, there are two buttons: 'Annuleer' and 'Opslaan'.

Tasks

In the task menu, you can also add notifications. This way, you can send a reminder to the person responsible for the task a few (chosen by you) working days before your task starts.

The diagram illustrates the process of adding a new notification to a task. On the left, the 'Task 43' overview shows the 'Notifications (0)' tab. A blue arrow points to the 'New notification' dialog on the right. This dialog includes a text area for the message, a character count (250), a field to specify the number of working days before the task starts (set to 5), and 'Cancel' and 'Confirm notification' buttons.

Complete Task

Back to task detail

New notification

Your message:

Hi, ... within the project ""Bitfactory" housing project" you are responsible for "Test task". By clicking on "Confirm" you confirm that you will start in the number of workable days listed on the right for "workable days to start". You also accept the content of the notification.

250 characters

Send notification:

5 Working day(s) before a task starts

Cancel Confirm notification

The message is displayed in a notification overview as shown in the example next to it and is visible to both the project partner and the project manager.

This screenshot shows the 'Task 43' overview with the 'Notifications (3)' tab selected. It displays a list of three notifications with their creation dates, messages, and status (Scheduled, Not accepted, Accepted). A 'Back to task detail' link is at the bottom.

Cancel Save

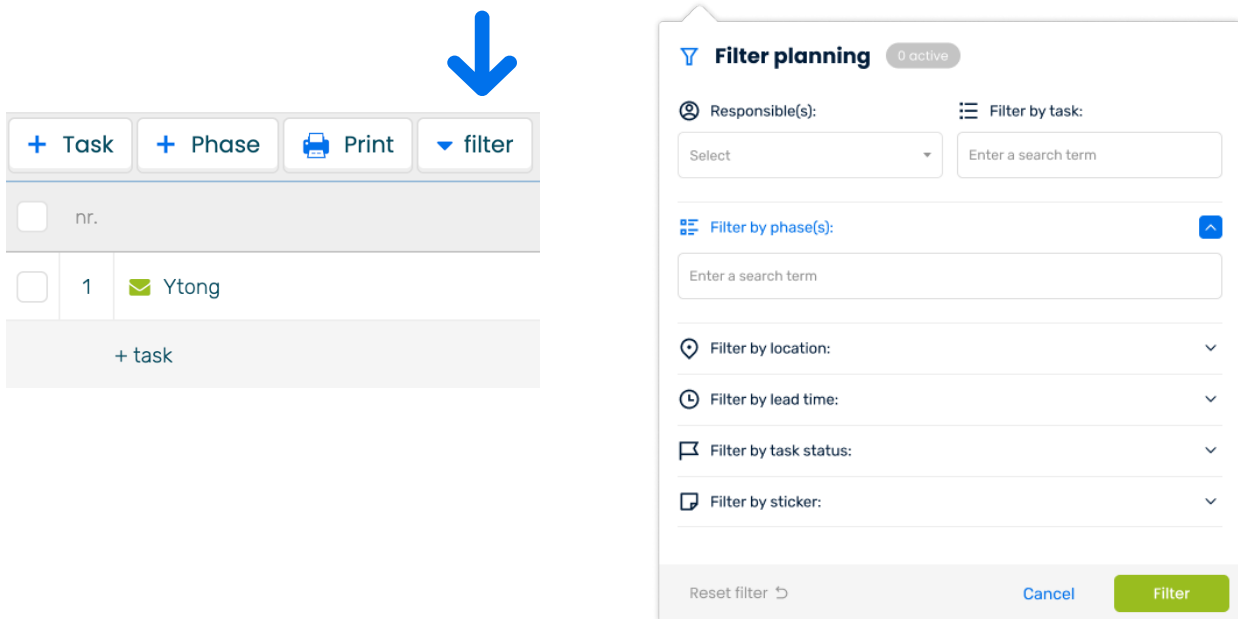

The filled in information will be displayed on the post-it, as shown below. When you hover your mouse over the post-its, you can see the full information.

You can expand the menu further to the right of the post-it (where the arrow is indicated).

Filtering

We have added various filtering options to KYP Project so that you can easily search for specific tasks, locations, people, and more in your schedule. You will find the filter button next to the print button at the top of the task list.

You can expand the filter options with the arrows on the right side of the menu. Simply check which filters you want to activate and then click 'apply'.

You can filter on the following options:

- ← Responsible
- ← Tasks
- ← Phases
- ← Location
- ← Duration
- ← Task status
- ← Sticker

Add Project Manager

Now the tasks and the sticky notes have been scheduled, it is time to add the participants to the project. By clicking 'project members' in the menu on the left you can add all parties involved to the project.

Please note: As long as the project has not been activated, the parties will not receive invitations to take part.

- Enter the email address of the person you want to add to the schedule – if the person already has a KYP Project account the remaining fields are completed automatically.
- Assign the person a role and a colour and click Add. The various roles are explained on the next page.
- Continue until you have added everyone to the schedule. You can always add or remove people later.

The screenshot shows the 'KYP PROJECT NORTH AMERICA > USER LIST' interface. On the left, a sidebar contains icons for 'WORKING DAYS', 'INACTIVE', 'PLANNING', 'PROJECT MEMBERS' (highlighted with a blue arrow), 'MESSAGES', and 'DOCUMENTS'. The main area features a form to add a new user. The form fields are: 'E-MAIL*' (containing 'projectpartner@kyp.nl' with a blue arrow pointing to it), 'TYPE*' (with a dropdown menu open showing options: 'Projectmanager', 'Supplier/Performer' (highlighted with a blue arrow), 'Supervisor', 'Client', 'Clientmanager', and 'View Only'), 'FIRST NAME*' (containing 'Piet'), 'LAST NAME*' (containing 'Jansen'), and 'PROJECT COLOUR*' (with a yellow color swatch and a blue arrow pointing to it). To the right of the form is a green 'ADD' button (with a blue arrow pointing to it) and a 'Cancel' link. Below the form, a list of existing users is shown, including 'PM (Project manager)' and 'Project Manager' (S/P (Supplier/Performer) projectmanager@kyp.nl).

Pick your role

To distinguish between the various parties, you assign a role to each person in KYP Project. Below you'll find a list of all roles in KYP Project with a brief explanation of each

Project Manager (PM): The Project Manager has access to all functionalities within the project and can communicate with all roles.

Supplier/Performer (S/P): These participants carry out one or more of the scheduled jobs. They are usually subcontractors and project partners.

Supervisor (PS): The project supervisor can set jobs to completed and communicate with the project partners.

Client (C): The client only has access to information that is relevant to him/her.

Client manager (CM): The client advisor can communicate with the client and add information for the client.

View only (VO): Someone who wants access to the schedule but is not allowed to make any changes to the project. This role can fully view all tasks/documents. This could be a company director, for instance.

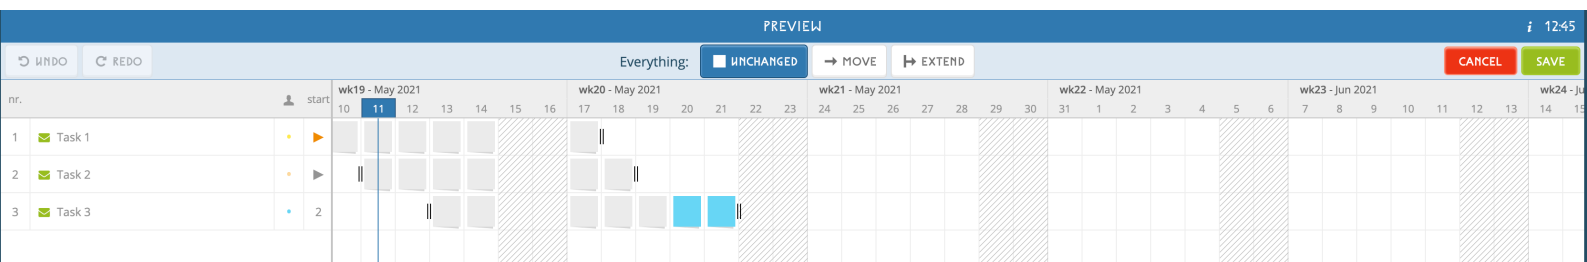

Oops?!

Is changing the schedule taking too much time? Not when you use Oops?! in KYP Project!

Need to change an live schedule, but don't want everyone to receive an instant notification? No problem! The Oops?! feature lets you easily adjust the schedule while the current schedule is put on hold. That means that another Project Manager can't change it at the same time.

When you change something you'll see an 'preview' schedule. Like you can see here down below. Here you can determine what should or should not be changed when, say, you've moved a task. What else can you do with the Oops?! feature?

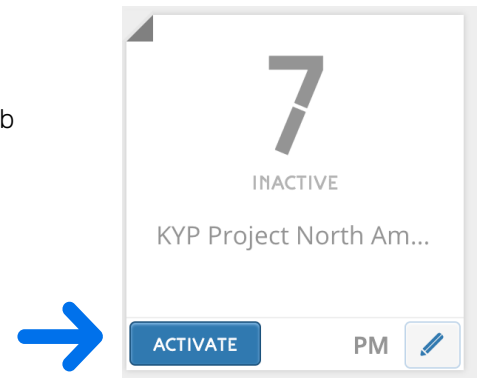

- ✧ Allow all trailing tasks to be moved as well
- ✧ Allow all trailing tasks to be extended
- ✧ Move or extend per task
- ✧ Move or extend per phase
- ✧ Go back one step with the 'Back' button
- ✧ Redo an action with the 'Redo' button
- ✧ Only save when you're sure you've added all the changes
- ✧ Add a message to explain the reason for the change

Activating a project

Schedule done? Great! Now you can activate it and start communicating with the other parties!

- Go back to your project list
 - If you already have active projects, go to the 'Inactive' tab
- Click 'Activate' in the project tile

You will be taken to the next screen for payment details

- Activate KYP Analytics for even more measurable information. Download the manual from the website to see what this entails
- See what you can save with KYP Project
- Enter the correct billing information and click 'Activate'.

Congratulations! Your first project is now live and everyone will be sent an invitation!

Printing?!

For the few fans of printing left in the world, KYP Project has added a print function.

- ✧ Select the format you want to print
- ✧ Optionally, select a responsible party, period, and phase
- ✧ Click 'Print' and KYP Project will create a PDF file that you can print out

The screenshot shows the KYP Project Planning interface. The breadcrumb trail is: KYP > PLANNINGS > KYP PROJECT NORTH AMERICA > PLANNING. On the left sidebar, there's a 'WORKING DAYS' section showing '7 INACTIVE' and a 'PLANNING' section with a calendar icon. The main area has a table with columns: nr., Task, and start. The table contains three rows: Task 1, Task 2, and Task 3. A blue arrow points to the 'PRINT' button in the top right of the main area.

| nr. | Task | start |
|-----|--------|-------|
| 1 | Task 1 | |
| 2 | Task 2 | |
| 3 | Task 3 | 2 |

Below the table, there's a '+ task' button. The bottom section contains various settings for printing:

SIZE: A3

RESPONSIBLE: Choose a responsible

ORIENTATION: ☒ Landscape ☐ Portrait

SINGLE PAGE: ☐ Enable

COMPANY LOGO: ☐ Show company logo

WEEKS: ☒ All

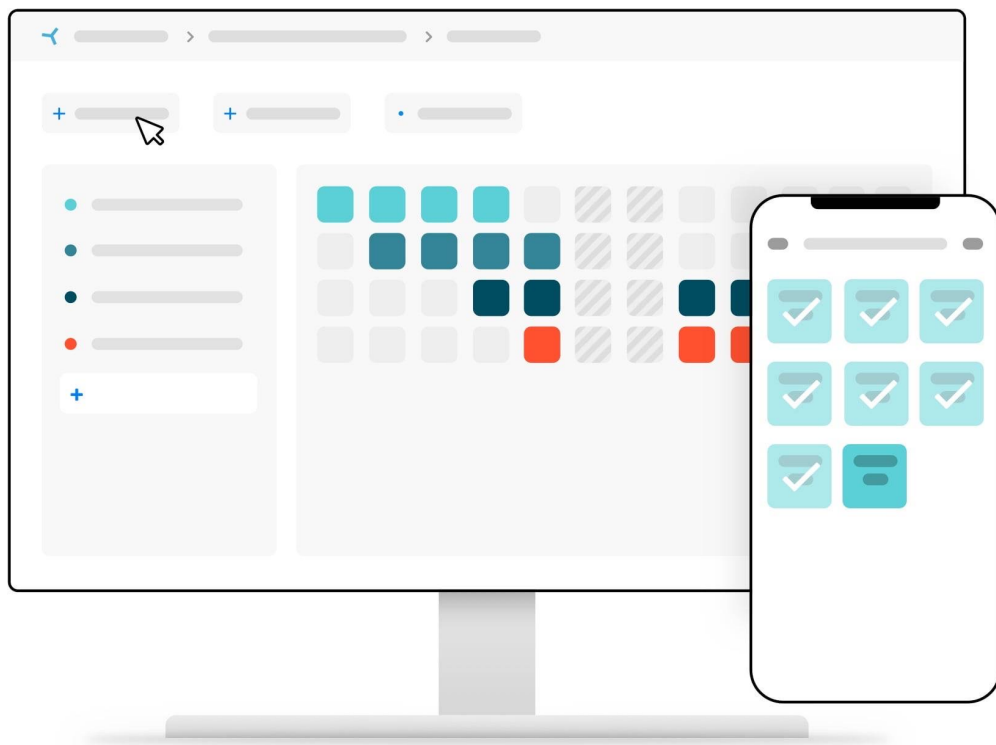

☐ From: 2021wk19 To: 2021wk25

☐ Custom:

E.g.: 2015wk1,2015wk3-2015wk5

At the bottom right, there are two buttons: 'Cancel' and 'PRINT'.

Good luck and get KYP-ing!
